Department of
Environmental Quality
Office of the Secretary
Legal Affairs Division

Extension of
Comment Period for
2002 Base Year
Emissions Inventory
for the Baton Rouge 8-Hour
Ozone Nonattainment Area
(0605Pot1)

Under the authority of the Louisiana Environmental Quality Act, R. S. 30:2001 et seq., the secretary gives notice that the Office of Environmental Assessment, Air Quality Assessment Division, will extend the comment period on the proposed 2002 Base Year Emissions Inventory for the Baton Rouge 8-hour ozone nonattainment area. The 5-parish nonattainment area consists of Ascension, East Baton Rouge, Iberville, Livingston, and West Baton Rouge Parishes. This revision to the Air Quality State Implementation Plan (SIP) is mandated under Section 110(a)(2)(F) and 172(c)(3) of the 1990 Clean Air Act Amendments (CAAA).

The Environmental Protection Agency has identified 2002 as the emissions inventory base year for the 8-hour ozone SIP planning process. The proposed inventory includes emission estimates from stationary point and nonpoint sources, onroad mobile sources, and nonroad mobile sources.

The Potpourri notice for the 2002 Base Year Emissions Inventory for the Baton Rouge 8-Hour Ozone Nonattainment Area was published on page 720 of the April 20, 2006, issue of the Louisiana Register. The public hearing will still be held at 1:30 p.m. on May 25, 2006, in the Galvez Building, Oliver Pollock Conference Room, 602 N. Fifth Street, Baton Rouge.

LA. The comment period has been extended until 4:30 p.m. June 30, 2006. Written comments should be submitted to Vivian H. Aucoin, Office of Environmental Assessment, Box 4314, Baton Rouge, LA 70821-4314 or to FAX (225) 219-3582 or by email to vivian.aucoin@la.gov.

A copy of the document may be viewed from 8 a.m. to 4:30 p.m. in the DEQ Public Records Center, Room 127, 602 N. Fifth Street, Baton Rouge, LA or on the internet at www.deq.louisiana.gov/pqr/la/Default.aspx?tabid=2381. Herman Robinson, CPM Executive Counsel 3324115-may 20-11

Extension of
Comment Period for
2002 Base Year Emissions
Inventory for the Baton Rouge
8-Hour Ozone Nonattainment
Area (0606Pot1)

Under the authority of the Louisi-
ana Environmental Quality Act,
R. S. 30:2001 et seq., the Sec-
retary gives notice that the Office
of Environmental Assessment,
Air Quality Assessment Division,
will extend the comment period
on the proposed 2002 Base Year
Emissions Inventory for the Bat-
on Rouge 8-hour ozone nonat-
tainment area. The 5-parish
nonattainment area consists of
Ascension, East Baton Rouge,
Iberville, Livingston, and West
Baton Rouge Parishes. This revi-
sion to the Air Quality State Im-
plementation Plan (SIP) is man-
dated under Section 110(a)(2)(F)
and 172(c)(3) of the 1990 Clean
Air Act Amendments (CAAA).

The Environmental Protection
Agency has identified 2002 as
the emissions inventory base
year for the 8-hour ozone SIP
planning process. The proposed
inventory includes emission esti-
mates from stationary point and
nonpoint sources, onroad mobile
sources, and nonroad mobile
sources.

The Potpourri notice for the 2002
Base Year Emissions Inventory
for the Baton Rouge 8-Hour
Ozone Nonattainment Area was
published on page 720 of the
April 20, 2006, issue of the Loui-
siana Register. The public hear-
ing will still be held at 1:30 p.m.
on May 25, 2006, in the Galvez
Building, Oliver Pollock Confer-
ence Room, 602 N. Fifth Street,
Baton Rouge, LA. The comment
period has been extended until

4:30 p.m., June 30, 2006. Written
comments should be submitted
to Vivian H. Aucoin, Office of En-
vironmental Assessment, Box
4314, Baton Rouge, LA

POTPOURRI

**Department of Environmental Quality
Office of the Secretary
Legal Affairs Division**

**2002 Base Year Emissions Inventory for the Baton Rouge
8-Hour Ozone Nonattainment Area**

Under the authority of the Louisiana Environmental Quality Act, R. S. 30:2001 et seq., the secretary gives notice that the Office of Environmental Assessment, Air Quality Assessment Division, is proposing the 2002 Base Year Emissions Inventory for the Baton Rouge 8-hour ozone nonattainment area. The 5-parish Baton Rouge Nonattainment Area consists of Ascension, East Baton Rouge, Iberville, Livingston, and West Baton Rouge Parishes. This revision to the Air Quality State Implementation Plan (SIP) is mandated under Section

110(a)(2)(F) and 172(c)(3) of the 1990 Clean Air Act Amendments (CAAA).

The Environmental Protection Agency has identified 2002 as the emissions inventory base year for the 8-hour ozone SIP planning process. The proposed inventory includes emission estimates from stationary point and nonpoint sources, onroad mobile sources, and nonroad mobile sources.

A public hearing will be held on May 25, 2006, at 1:30 p.m. in the Galvez Building, Oliver Pollock Conference Room, 602 N. Fifth Street, Baton Rouge, LA. Interested persons are invited to attend and present oral comments on the proposal. Should individuals with a disability need an accommodation in order to participate, contact Vivian H. Aucoin at the address given below or at (225) 219-3575. Free parking is available in the Galvez Garage with a validated parking ticket.

All interested persons are invited to submit written comments concerning the SIP revision no later than 4:30 p.m., May 31, 2006, to Vivian H. Aucoin, Office of Environmental Assessment, Box 4314, Baton Rouge, LA 70821-4314 or to FAX (225) 219-3582 or by e-mail to vivian.aucoin@la.gov.

A copy of the document may be viewed from 8 a.m. to 4:30 p.m. in the DEQ Public Records Center, Room 127, 602 N. Fifth Street, Baton Rouge, LA, or on the Internet at www.deq.louisiana.gov/portal/Default.aspx?tabid=2381.

POTPOURRI

Department of Environmental Quality Office of the Secretary Legal Affairs Division

Beauregard Parish Ozone Maintenance Plan

Under the authority of the Louisiana Environmental Quality Act, R. S. 30:2001 et seq., the secretary gives notice that the Office of Environmental Assessment, Plan Development Section, is proposing a revision to the Air Quality State Implementation Plan (SIP) for Beauregard Parish. This SIP revision is mandated under Section 110(a)(1) of the 1990 Clean Air Act Amendments (CAAA).

According to the Phase 1 8-Hour Implementation Rule published April 30, 2004 (69 FR 23951), a revision to the SIP is required for areas that are designated attainment for the 8-hour ozone National Ambient Air Quality Standards (NAAQS) and were designated attainment for the 1-hour ozone NAAQS with an approved maintenance plan. The Section 110(a)(1) maintenance plan for Beauregard Parish must be submitted to the Environmental Protection Agency not later than June 15, 2007.

A public hearing will be held on May 25, 2006, at 1:30 p.m. in the Galvez Building, Oliver Pollock Conference Room, 602 N. Fifth Street, Baton Rouge, LA 70802. Interested persons are invited to attend and present oral comments on the proposal. Should individuals with a disability need an accommodation in order to participate,

contact Vivian H. Aucoin, at the address given below or at (225) 219-3575. Free parking is available in the Galvez Garage with a validated parking ticket.

All interested persons are invited to submit written comments concerning the SIP revision no later than 4:30 p.m., May 31, 2006, to Vivian H. Aucoin, Office of Environmental Assessment, Box 4314, Baton Rouge, LA 70821-4314 or to FAX (225) 219-3582 or by e-mail to vivian.aucoin@la.gov.

A copy of the SIP revision for Beauregard Parish may be viewed from 8 a.m. to 4:30 p.m. in the DEQ Public Records Center, Room 127, 602 N. Fifth Street, Baton Rouge, LA, or at the Southwest Regional Office located at 1301 Gadwall Street, Lake Charles LA. The document is available on the Internet at: www.deq.louisiana.gov/portal/Default.aspx?tabid=2381.

DEPARTMENT OF ENVIRONMENTAL QUALITY

IN RE:
2002 BASE YEAR EMISSIONS INVENTORY FOR THE
BATON ROUGE 8-HOUR OZONE NON-ATTAINMENT AREA
LOG NO.: 0604POT3

The Hearing Concerning
**2002 BASE YEAR EMISSIONS INVENTORY FOR THE BATON
ROUGE 8-HOUR OZONE NON-ATTAINMENT AREA**
held, at the Galvez Building, Oliver Pollock
Conference Room, 602 North Fifth Street, Baton
Rouge, Louisiana, beginning at 1:32 p.m., on May
25, 2006.

BEFORE: Megan B. Welch
Certified Court Reporter
In and For the State of
Louisiana

ASSOCIATED REPORTERS, INC.

RECEIVED

JUN 15 2006

REGULATION DEVELOPMENT SECTION

A P P E A R A N C E S

HEARING OFFICER:
SANDY STEPHENS

1 **MS. STEPHENS:**

2 Good afternoon. My name is Sandy Stephens.

3 I'm employed with the Louisiana Department of
4 Environmental Quality, and I'll be serving as
5 Hearing Officer this afternoon to receive
6 comments on the Beauregard Parish Ozone
7 Maintenance Plan and the 2002 Base Year
8 Emissions Inventory for the Baton Rouge 8-Hour
9 Ozone Nonattainment Area revisions to the State
10 Implementation Plan (SIP).

11 We will also receive comments today
12 regarding proposed amendments to the Water
13 Quality regulations.

14 The comment period for these amendments
15 began on April 20, 2006, when the potpourri
16 notices and the proposed rule were published in
17 the Louisiana Register. The comment period for
18 the SIP revisions will close at 4:30 p.m. on
19 June 30, 2006. The comment period for the
20 amendments to the Water Quality regulations will
21 close at 4:30 p.m., today, May 25, 2006. It
22 would be helpful to us if all oral comments
23 received today were followed up in writing.

24 This public hearing provides a forum for all
25 interested parties to present comments on the

1 proposed changes. I'll ask that each person
2 commenting come up and sit at the front table
3 and begin by stating his or her name and
4 affiliation for the record.

5 The second amendment to the State
6 Implementation Plan is the 2002 Base Year
7 Emissions Inventory for the Baton Rouge 8-Hour
8 Ozone Nonattainment Area, Potpourri No.
9 0604Pot3.

10 The secretary gives notice that the Office
11 of Environmental Assessment, Plan Development
12 Section, is proposing 2002 Base Year Emission
13 Inventory for the Baton Rouge 8-hour ozone
14 nonattainment area. The 5-Parish Baton Rouge
15 Nonattainment Area consists of Ascension, East
16 Baton Rouge, Iberville, Livingston, and West
17 Baton Rouge Parishes. The revision to the Air
18 Quality State Implementation Plan is mandated
19 under Sections 110(a)(2)(F) and 172 (c)(3) of
20 the 1990 Clean Air Act Amendments. The
21 Environmental Protection Agency has identified
22 2002 as the emissions inventory base year for
23 the 8-hour ozone SIP planning process. The
24 proposed inventory includes emission estimates
25 from stationary point and nonpoint sources,

1 onroad mobile sources, and nonroad mobile
2 sources.

3 Does anyone care to comment on this
4 amendment?

5 If not, the hearing on the 2002 Base Year
6 Emissions Inventory for the Baton Rouge 8-hour
7 Ozone Nonattainment Area is closed.

R E P O R T E R ' S P A G E

I, Megan B. Welch, Certified Court Reporter,
in and for the State of Louisiana, the officer,
as defined in Rule 28 of the Federal Rules of
Civil Procedure and/or Article 1434(b) of the
Louisiana code of Civil Procedure, before whom
this sworn testimony was taken, do hereby state
on the Record

That due to the interaction in the
spontaneous discourse of this proceeding, dashes
(--) have been used to indicate pauses, changes
in thought, and/or talk overs; that same is the
proper method for a Court Reporters's
transcription of proceeding, and that the dashes
(--) do not indicated that words or phrases have
been left out of this transcript;

That any words and/or names which could not
be verified through reference material have been
denoted with the phrase "(inaudible)."

Megan B. Welch, C.C.R.

UNITED STATES ENVIRONMENTAL PROTECTION AGENCY

REGION 6
1445 ROSS AVENUE, SUITE 1200
DALLAS, TX 75202-2733

June 28, 2006

Ms. Vivian Aucoin
Office of Environmental Assessment
Louisiana Department of Environmental Quality
P.O. Box 4314
Baton Rouge, LA 70821-4314

Dear Ms. Aucoin:

We have reviewed the proposed 2002 Base Year emissions inventory (EI) for the Baton Rouge ozone nonattainment area and have the following comments.

Table 1.2, (page 1), should clarify whether the ozone exceedance days for the Baton Rouge area are for the 1-hour ozone standard or the 8-hour ozone standard. If the table is for the 1-hour standard it should be replaced with a table for the 8-hour standard.

A discussion of the relationship of the 2002 Base Year EI with other inventories developed by the Louisiana Department of Environmental Quality (LDEQ) should be added to the Introductory section. This should include discussion of:

- the 1990 Base Year EI for the 1-hour ozone standard,
- periodic EIs,
- the Consolidated Emissions Reporting Rule inventory, and
- inventories used for rate of progress demonstrations.

Emissions from the Trunkline Gas Company in St. Mary Parish were included in a revised 1990 Base Year EI. Whether these emissions were included in the 2002 inventory should be addressed in the discussion as well as reasons why they were included or excluded.

The inventory should include ozone season daily emissions and other data elements from the Consolidated Emissions Reporting Rule (40 CFR 51 Subpart A). We recommend that LDEQ review the emissions calculated for the various source categories. In particular, the calculations and rule effectiveness formula used to calculate nonpoint sources should be reviewed (Appendix E).

The discussions of facilities, (page 12), indicates that 74 facilities were added to the list of point source facilities since the 1990 base year EI (154 facilities for 2002, 80 facilities for 1990). LDEQ should further discuss the changes to the point source facilities list and the effect

the changes had on earlier inventories. The additional discussion should include:

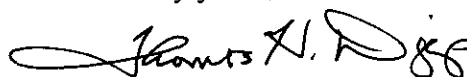

- whether these sources were accounted for in earlier EIs, and
- whether the Periodic Inventories captured most, if not all, of these 74 sources.

The discussion of inventory development for stationary nonpoint sources indicates that the U.S. Environmental Protection Agency's 2002 preliminary National EI was used for some sources and an inventory developed for the Central Regional Air Planning Association was used for other sources (page 15). It would be useful to include a table identifying categories of sources, which organization provided data for the category, and a reference for development of the data.

Commercial aircraft emissions should be included in the 2002 Base Year EI. Discussions with LDEQ staff indicate that these emissions were included and Appendix G, (2002 Nonroad Mobile Source Emissions by SCC), includes commercial aircraft emissions. However, the narrative on aircraft emissions indicates that commercial aircraft emissions were not included (page 23). The narrative should be revised to clarify that commercial aircraft emissions were included and discuss how they were calculated.

We appreciate the opportunity to comment on the 2002 Base Year EI. If there are any questions concerning our comments, please contact me or Carl Young of my staff at (214) 665-6645.

Sincerely yours,

Thomas H. Diggs
Chief
Air Planning Section

cc: Ms. Jennifer Mouton (LDEQ)
Mr. Cedric Mellion (LDEQ)

EPA's comment 1: Table 1.2 (page 1), should clarify whether the ozone exceedance days for the Baton Rouge area are for the 1- hour standard or the 8- hour standard. If the table is for the 1- hour standard it should be replaced with a table for the 8- hour standard.

LDEQ's response: The table was replaced with Table 1.1-1 showing 8- hour ozone exceedances.

EPA's comment 2: A discussion of the relationship of the 2002 Base Year EI with other inventories developed by the Louisiana Department of Environmental Quality (LDEQ) should be added to the introductory section. This discussion of:

- The 1990 Base year EI for the 1- hour standard
- Periodic EIs
- The Consolidated Emissions Reporting Rule (CERR)
- Inventories used for rate of progress demonstrations

LDEQ's response:

In 1990 the state of Louisiana produced the Base Year SIP Emissions Inventory for the Baton Rouge and Calcasieu Ozone Nonattainment Area which at that time was considered a serious area for ozone. This inventory addressed VOC, NO_x, and CO emissions for stationary point, stationary nonpoint (which at that time was referred to as stationary area), non- road, and on- road mobile sources. This inventory served as the baseline inventory for the previous one hour ozone standard. According to the Clean Air Act (CAA) section 182(a) (3) (A), a designation of "serious" requires subsequent inventories to be submitted every three years. These periodic emissions inventories (PEI) were submitted for the years of 1993, 1996, 1999, and 2002. It should be noted that due to the implementation of the Consolidated Emissions Reporting Rule (CERR), 40 CFR Part 51, the 2002 PEI was submitted but not required. (First paragraph of section one)

This inventory replaces the 1990 Base Year SIP Emissions Inventory of the Baton Rouge and Calcasieu Ozone Nonattainment Area referred to previously. Accordingly, as Calcasieu reached attainment in 1997 (62 FR 24036) this inventory reports emissions for the Baton Rouge Ozone Nonattainment Area, which includes Ascension, Iberville, East Baton Rouge, Livingston, and West Baton Rouge Parishes. (Found within the body of the second paragraph of section one)

EPA's comment 3: Emissions from Trunkline Gas Company in St. Mary Parish were included in a revised 1990 Base Year EI. Whether these emissions were included in the 2002 inventory should be addressed in the discussion as well as reasons why they were included or excluded.

LDEQ's response: It should be noted that the 1990 base year inventory included Trunkline Gas Company Patterson facility in St. Mary Parish in the point source inventory. These emissions were included per EPA guidance, in order to satisfy

reductions by rate of progress for 1999. Trunkline Gas Company Patterson facility emissions will not be included in this inventory for 2002. This inventory includes the Baton Rouge Area only. (Found at the beginning of the third paragraph of section two)

EPA's comment 4: The inventory should include ozone season daily emissions and other data elements from the Consolidated Emissions Reporting Rule (40 CFR 51 Subpart A). We recommend that LDEQ review the emissions calculated for the various source categories. In particular, the calculations and rule effectiveness formula used to calculate the nonpoint sources should be reviewed (Appendix E)

LDEQ's response: A formula correction was made to the Source Classification Codes that were affected by rule effectiveness. Ozone season daily emissions were subsequently recalculated using a method illustrated in appropriate Appendix.

EPA's comment 5: The discussions of facilities, (page 12) indicate that 74 facilities were added to the list of point source facilities since 1990 base year EI (154 facilities for 2002, 80 facilities for 1990). LDEQ should further discuss the changes to the point source facilities list and the effect the changes earlier inventories. The additional discussion should include:

- Whether these sources were accounted for in earlier EIs
- Whether the Periodic Inventories captured most, if not all, of these 74

LDEQ's response: In addition it should also be noted that fluctuations in the number of facilities included in this inventory and previous inventories are a direct result of new permits, facility closures, exclusion due to falling below the threshold, inclusions due to permit modifications, and enforcement actions. These fluctuations have been recorded post year for all reporting year inventories. (I.e. changes in the 2002 reporting year inventory were recorded in the 2003 calendar year) (Found at the end of the third paragraph of section two)

EPA's comment 6: The discussions of inventory development for stationary nonpoint sources indicates that the U.S. Environmental Protection Agency's 2002 preliminary National EI was used for some sources and an inventory developed by Central Regional Air Planning Association was used for other sources (page 15). It would be useful to include a table identifying categories of sources, which organization provided data for the category, and a reference for development of the data.

LDEQ's response: A graph was created outlining the source of the data and the page in the corresponding appendix was given.

EPA's comment 7: Commercial aircraft emissions should be included in the 2002 base year EI. Discussions with LDEQ staff indicate that these emissions were included and the Appendix G, (2002 Nonroad Mobile Source Emissions by SCC), includes commercial aircraft emissions. However, the narrative on aircraft emissions indicate the commercial aircraft emissions were not included (page 23). The narrative should be revised to clarify that commercial aircraft emissions were included and discuss how they were calculated.

LDEQ's response: The line "However, emissions from this source were considered inconsequential by STI and not calculated." was deleted from the text.
